# **Patrons**Always Pay the Losses of Private Ownership

Wherever a company comes before a community looking for a framedise, as the International is now looking for a gas franchise in Edimonton, there are always those who arise to argue that the city canmot afford to take the risk of embarking in the enterprise for which the company asks the franchise, and that it is better and safer

policy to give the franchise away to the private company.

If the loss, in case there should be a loss—in the first year of the operation of a gas franchise, or any other franchise, was borne by the company, this might be good argument. But everyone knows that no matter what may be the expense of installation and of the first years of opration, uncless the company goes absolutely bank-rupt and is sold out by the sheriff, the deficit is eventually made up

from the rates charged the patrons of the utility.

There is nothing to show that at the price which he International is asking for the privilege to sell gas in Edmonton, the comall-wing, for the sake of argument, that the company win actually record a deficit for a period of years, the franchise-hunters themselves would not undertake to state that they would not take all this deficit back immediately the business arrived at the point where they could do so. And on top of this the company will have to have

this is the essential point of difference between private ownership of a franchise and the municipal ownership of the utility. The company must make money, on matter how high the price to the patrosn, but the city never intends to maks money, no matter how low- the price may go.

low- ike price may go.

To hand the gas franchise out to a private company would be to tile the city up for a quarter of acentury which has no other object except to make money out of the enterprise. To retain the franchise, and embark in the gas business as a municipal enterprise would be to assive the patrons of the municipal plant the cheapest gas that could be produced.

# Protected Interests Umeasy About Fulure Legislation

Advices from Washington indicate that the reciprocity deal is going to go through the special session without delay and that the United States Congress will be found overwhelmingly in favor

of Et, while the senate is not likely to present any serious opposition.

The outstanding feature about the special session, however, will be that the reciprocity deal negotiated by a republican cabinet, and whiled a republican house failed to pass, will be passed by a democrartic house, the control of the representative body now having

passed into the hands of the democrats.

What will happen in the following session is the conjecture that is sworrying the minds of the protected interests. The reciprocity enactionent having fallen into their hands, the democrats are in a enact-ment having fallen into their hands, the democrats are in a possition to claim credit for something which the republicans failed to possition to claim credit for something which the republicans failed to possition to claim credit for something which the republicans failed to possition to claim credit for something which the republicans failed to possition to consider the many of the foremost American stopping there. The tariff on woollens and cotton has been a pet aversion of the democrats for many sessions in Cityle Pitch's 'Major Andre'' and it back, and it is already pretty generally conceded that the democrats will proceed at as early a date as possible to very materially modify the textile clauses, and following this to attack some of the other most objectionable clauses of the Payne-Aldrich tariff.

other most objectionable clauses of the Payne-Aldrich tariff.

With the democrats in control of the house and in favor of a lower tariff all around it is evident that the day of high tariff and the special privilege is about over in the United States. That Canada will follow the example of Uncle Sam and lower a whole lot of duties on manufactured goods is almost a certainty, and it is the fear thant this will be the eventual outcome of the present reciprocity arramgement that makes the protected interests both in United States and Canada so uneasy at the present time.

# Pattsburg to Farnish Test of Des Moines Plan

By those who oppose the commission form of government it is freequently argued that up to the present time it has never had a

Of Des Moines, however, it can be said that their civic government.

(Intention Exposition)

(Company own the Intention Exposition)

(Intention Exposition)

(Company own the Intention Exposition and The Southam Product and The Cottage City of the Cit

memt was never wholly corrupt nor vicious, and the test might be

con-sidered of the parlor variety.

But row comes the city of Pittsburg, Pa., with a demand for the connission form of government, and citizens of Pittsburg are besieging the Pennsylvania legislature with a demand for legislation which will make the adoption of the commission system of government possible in the Smoky City.

With Pittsburg on the commission system the system will get the test that the opponents demand. Probably no city in the United Stattes has been cursed with a more vicious and abandoned civic government than Pittsburg, and no city has been more completely capative to the political ringsters. Every form of civic corruption from Bribery to grand larceny has been rampant in that city for years until Pittsburg has become the star example in United States of a city mis-governed.

If Pittsburg gets the commission form of government and if the commission system gets he commission form of government and the commission system gets Pittsburg a decent and honest government, fafter a meal sis especially beneficial to them the question of whether the commission system of government will stand the test will have been settled once and for all.

# What Canada Has Done for the Canadian Pacific

Canadian Pacific

In a circular issued with the dividend checks, Sir Thomas Shaughnessy informs stockholders in the C. P. R. that besides its own railway lines with their immense ramifications, the company is preparing to reduce holds stocks and bonds of other companies to the value of \$40,000. The company is own use worth \$65,000,000 and, and mortgages and proceeds from land sales of \$50,000,000. In the company own use worth \$65,000,000 and, \$7,000,000 areas of unsold agricultural land in the Canadian northwest. Sir Thomas says that he is confident that the company will have no difficulty in maintaining the 10 per cent. dividend rate and that it will not take by any means all the carnings of the company to do so, the baalnee being available for re-investment.

On this showing the Canadian Pacific is not; only the greatest railway in the world. When it is considered that the wealth of the C. P. R. tis derived mainly from the grain trade of western Canada and the traffic which it creates, some idea of what the development of Western Canada within the past two decades has meant to this company.

HIS WORK BEST

While barley is ranging around fifty cents in Winnipeg and dollar in Chicago, the eastern papers which are trying to make the country believe that reciprocity will ruin the dominion might as well count the farmers of the west among the incorrigibles.

# F. FRASER TIMS 120 McDougall Avenue.

# REAL BULLETIN

In business properties, Cen-tral Jasper Avenue has changed hands today and en-quiry for Namayo avenue, be-tween tracks and Boulevard, continues strong. Some atten-tion is also being paid to Fra-ser avenue north, and Queen's avenue, opposite market.

In residential, Inglewood Groat, H. B. Reserve, in west end and north of C.N.R. yards, with Norwood, Westwood and Delton in the north and east, are all enquired for.

In houses, there is no change to note, as the demand is in the sections mentioned Satur-day and for a week past.

# ALBERTA PARK

As the spring opens, this Suburb is being more en-quired for daily, and we ad-vise those contemplating the purchase of one or more blocks to make their selec-tions as early as possible.

Lots 17 and 18, Block 37 ...... \$960 ½ Cash, balance 1 and 2 Years.

DW MICH CLAN

"You don't mind high prices?"
"No," replied, the resolute-philosoier. "When prices are high, thinh
w much more you saye every time
un decide to get along without someing."—Washington Star.
